Throughput vs Load for vLLM
Future Steps

Benchmarking and Performance Analysis of LLM Inferencing Systems

Systems for LLMs
Under Prof. Mythili Vutukuru

Indian Institute of Technology Bombay
Autumn 2025-26

Throughput vs Load for vLLM
Future Steps

- Targeted a very specific workload
- Large system prompt ($\approx$ 1500 tokens) containing useful context and shared across all the queries
- Varying query input rate (from 5 req/sec to 700 req/sec)
- Small query sizes (10 to 20 tokens each) and small output requirements (capped at 30 to 50 tokens)
- Ideally, prefix sharing should help a lot
- **Next Step:** Family of requests, each family with a particular large system prompt and a few queries
